Expertise

- Responsibility
- Creativity
- Critical Thinking
- Perseverance
- Problem-Solving

Language

- English Advanced
- Persian Native Speaker

Technical Skills

- Golang 85%
- Python 85%
- Blockchain 80%
- Solidity 75%
- Docker 70%
- C++11 70%

Experience

Golang Developer - Full time

Yekta Kuknos Pars

Tehran, Iran - Sep 2024 to now

- Worked on Iran's national level project, the Central Bank's Digital Currency (CBDC), the Digital Rial Project
- Solved Problems aroused by strict security measures
- Worked in collaboration with several banks such as Refah Bank, Dey Bank, Saderat Bank, Post Bank, and...
- Contributed quality Golang code to the codebase.
- Deployed the project to the bank's servers.
- Used and interacted with technologies such as HSM and PKCS11.

Blockchain bootcamp owner - Part time

Quera - Tehran, Iran - Jun 2023 to Jan 2024

- Set the bootcamp headlines
- Selected the bootcamp instructors
- Selected the bootcamp mentors
- Designed the bootcamp problems including the test cases

Linux Bootcamp Mentor and problem setter - Part time

Quera - Tehran, Iran - Jan 2024 to Jul 2024

- Mentored a team of 5 people to keep them oriented toward learning the concept of linux-based operating systems.
- Set bash scripting problems including the testcases.
- Helped the team on the bash scripting problems.

Blockchain Developer - Part time

Noursun Energy - Tehran, Iran - Feb 2024 to Present

- Designed the energy marketplace contracts
- Designed the marketplace system
- Developed cryptocurrencies for research purposes

Network and DevOps Specialist - Part time

Danesh Rayan Arvin - Tehran, Iran - Feb 2024 to Present

- Deployed needed containers on a local server machine
- Installed VMWare ESXi on the machine
- Networking and IP assignments on the local network

Education

Shahid Beheshti University

Bachelor of Computer Engineering

GPA: 18.03 - 2019 to 2024

- Major courses: Advanced programming, Computer Architecture, Algorithm Designs, Compiler Implementation, Operating Systems, Automata Theory, Database Systems, Signal And Systems
- TA at courses: CryptoCurrencies, Computer Architecture, Algorithm Designs, Automata Theory, Advanced Programming, Discrete Math, Signal And Systems

Atomic Energy High School

Diploma of Physics and Mathematics

GPA: 19.58 - 2016 to 2019

Open Source Projects

Decaf Compiler

A decaf compiler written from scratch in moden C++ for compiler design course.

C++

CMAKE

BISON

YACC

PCoin

A Proof-of-Work cryptocurrency implementation.

PYTHON

Ascon Hash Java

An implementation of Ascon hash in Java.

JAVA

VANET-Privacy-Oriented-Traffic-Data

Blockchain based public traffic data system. A research paper's code.

PYTHON

Contributions

SEAL Library

Had some pull requesting leading to hot fixes on version 4.1.2.

C++

Certificates

Golang course at Quera College

Learned golang through the course brought by me colleagues at Quera.

GOLANG

International Exams

IELTS:

- Listening: 8
- Speaking: 7.5
- Writing: 6.5
- Reading: 6

Overall: 7

Current Learning

- Rust
- Reinforcement Learning

Important Scores

Algorithms: 20

Fundamentals of Programming: 20

Advanced Programming: 17

Automata Theory: 20

Computere Architecture: 20

Compiler Design: 19.25

Internet Engineering: 17.25
